

RELAZIONE PERIODICA

Mesi di gennaio-febbraio 2025

Dottorando	Ken Tanaka Hernandez
CUP progetto	I53C21000370006
Corso di dottorato	Applied Data Science and Artificial Intelligence (ADSAI) Università degli Studi di Trieste
Ciclo-anno accademico	XXXIX
Tutor scientifico	Monica Sugan

**ATTIVITÀ DI RICERCA E FORMATIVE

Development continued on the OGS machine-learning pipeline for earthquake detection and classification. Processing steps were consolidated for repeatable use on larger datasets, while PhaseNet, EQTransformer, PyOcto and GaMMA provided the methodological basis. Model predictions were assessed with accuracy, precision, and recall, and the workflow remained compatible with ADA Cloud and Leonardo/Galileo100 resources. The main milestone was a structured, reusable pipeline treating model performance and computational requirements as central aspects of seismic analysis.
