Dottorando	Ken Tanaka Hernandez
CUP progetto	I53C21000370006
Corso di dottorato	Applied Data Science and Artificial Intelligence (ADSAI) Università degli Studi di Trieste
Ciclo-anno accademico	XXXIX
Tutor scientifico	Monica Sugan

ATTIVITÀ DI RICERCA E FORMATIVE TUTORAGGIO E DIDATTICA CONFERENZE RISULTATI DELLA RICERCA ALTRO

The OGS project underwent substantial refactoring: catalog, clustering, parsing, sequencing, downloading, plotting, and constants were reorganized, documented, and tested. Leonardo/HPC configurations and data handling were updated, plotting and clustering workflows improved, generated figures cleaned up, and thesis/unit-test material added. Parser and logging fixes strengthened robustness, while catalog comparisons gained recall, FDR, RMSE, and MAE reporting. Merge commits were checked parent-by-parent and integrated work counted once.
